

Database Visibility

AppDynamics Database Visibility provides end-to-end visibility on the performance of your database. It helps you troubleshoot problems such as slow response times and excessive load. It also provides metrics on database activities, such as:

- SQL statements or stored procedures that are consuming most of the system resources
 - Statistics on procedures, SQL statements, and SQL query plans
 - Time spent on fetching, sorting, or waiting on a lock
 - Activity from the previous day, week, or month
-

Installation and Administration

- [Install the Database Agent](#)
- [Start and Stop the Database Agent](#)
- [Upgrade the Database Agent](#)

Configuration

- [Configure the Database Agent](#)
- [Add Database Collectors](#)

Using Database Visibility
