

Manage App Agents

On this page:

- [Requirements](#)
- [Watch the Video](#)
- [Associate App Agents with a Business Application](#)
- [Reset App Agents](#)
- [Enable and Disable App Agents](#)
- [Delete App Agents](#)

You can manage app agents connected to the Controller from the AppDynamics Agents window. Click **Settings > AppDynamics Agents > App Server Agents** to view information, reset agents, disable agents, and more.

Requirements

To manage app agents, users must belong to a role with the following Account Level Permission:

- **Administer users, groups, roles, authentication, etc. View License. View AppDynamics Agents. Use Agent Download Wizard.**

By default only Account Owners see the list of the agents in the account. See [Roles and Permissions](#).
