

Integrate and Use AppDynamics for Databases with AppDynamics Pro

See the following configuration topic:

- [Integrate AppDynamics for Databases with AppDynamics Pro 3.7 and higher](#)

If you are installing AppDynamics for Databases on the same host as the AppDynamics Controller, see also [Install AppDynamics for Databases and AppDynamics Controller on the Same Host](#).

Accessing AppDynamics for Databases from AppDynamics Pro is easy, see [Use AppDynamics Pro with AppDynamics for Databases](#).

In some cases AppDynamics for Databases cannot automatically recognize a database and you need to [manually map the database to an AppDynamics for Databases collector](#).
