Install and Get Started with AppDynamics for Databases

AppDynamics for Databases can monitor three categories of collectors. There are several collector types within these categories. The following lists the supported databases, servers, and storage systems now supported:

- Database Collector: DB2, GreenPlum, mongoDB, Microsoft SQL Server, Microsoft SQL Azure Database, MySQL, Oracle, PostgreSQL, Sybase ASE, and Sybase IQ
- Server Collector: IBM AIX Server, Linux Server, Solaris Server, and Windows Server
- Storage Collector: NetApp and NetApp E-Series
